Helping the world become zero waste, in style.  
Reusable bags for sustainable living.

**OUR IMPACT**

**SOMETIMES HELPING THE EARTH MEANS JOINING IT.**

**INTRODUCING BIO-KNIT**

We believe in fabrics that won't pollute landfills for decades to come. That's why, unlike other polyesters, all our signature Bio-Knit mesh, which is made from recycled plastic bottles, begins to biodegrade within just sixty days in landfills or sea water. And it will completely decompose within three to five years, just like cotton or wool.

Together, with the help of CICLO™ technology, we can solve how our fabrics dissolve. Bio-Knit is made and loved by humans, but easily returns to nature.

CICLO™ is ECO PASSPORT certified by OEKO-TEX®, which is a certification confirming that textile chemical suppliers are developing their textiles to be toxic free and unarmful to human health. Learn more @ [ciclotextiles.com](http://ciclotextiles.com).

Whether it's sourcing, manufacturing, packaging, or shipping, we make intentional choices to do what's best for both humans and nature. That mission took us on a two-year search to find the right mill partner for our fabric. Today, all Junes yarn and fabric is made in the US to reduce our supply chain distance and our carbon footprint.

All bags are made in Ciudad Juárez, Mexico by a family owned factory or by a women's sewing cooperative.

## THE UNBREAKABLE BAG, INSPIRED BY UNBREAKABLE WOMEN.

At Junes, we believe women support us. They shoulder us. They carry us.  
Now you can carry the bag that supports them back.
